EDUCATION

Ph.D. Department of Computer Science and Engineering, University of Nebraska-Lincoln, 2019

Dissertation: *Improving Spectrum Efficiency by Exploiting User and Channel Behaviors for Next Generation Wireless Networks*

Advisor: *Mehmet Can Vuran*

M.Sc. Department of Electronic Engineering, University of Electronic Science and Technology of China, 2009

Thesis: *Design and Implementation of Channelized Digital Receiver based on PCI-Express*

Advisor: *Zishu He*

B.Sc. Department of Electronic Engineering, University of Electronic Science and Technology of China, 2006

PROFESSIONAL APPOINTMENT (Full-Time)

2019-Present Postdoctoral Research Associate, Rice University, Houston, Texas

2013-2019 Graduate Research & Teaching Assistant, University of Nebraska-Lincoln, Lincoln, Nebraska

2011-2013 (Radio Frequency) Integration and Verification Engineer, Ericsson, Chengdu, China

2009-2011 Digital Signal Processing Software Engineer, ArrayComm, Chengdu, China

PROFESSIONAL DESIGNATION

Member of Institute of Electrical and Electronics Engineers (IEEE), 2013-present

IEEE Communications Society
IEEE Signal Processing Society

RESEARCH EXPERIENCE

2019-Present *Autonomous Networking for Multi-domain Operations*, Houston, Texas,
Advisor: Santiago Segarra

The vision of autonomous networking is to support military's distributed multi-domain operations, that are robust and resilient against near-peer adversaries.

Research on hardware-efficient graphs (networks)-based machine learning for distributed and discrete optimization in networked systems. Enhance distributed decision-making in routing and scheduling for wireless ad-hoc networks, by combining domain knowledge and graph-based machine learning.

2019-2019 *Computational Biology for Drug Repurposing*, Lincoln, Nebraska, Advisor: Tomas Helikar

Develop Python software to analyze human genome microarray data and molecular interaction network to facilitate drug repurposing for gene-related diseases.

2017-2019 *Cognitive Secure Cloud Radio Access Network for Efficient Spectrum Sharing*, Lincoln, Nebraska, Advisor: Mehmet Can Vuran

Work with a large team to build a large-scale testbed of cloud radio access network, which offers sub-6GHz experimental cellular, vehicle-to-infrastructure, and underground-to-aboveground communications in realistic environments across two university campuses and a public street. Research machine learning techniques for radio frequency signal processing and dynamic spectrum sharing. Experimental research on 5.8GHz vehicle-to-barrier channels for road safety facilities.

2013-2017 *Cog-TV: Business and Technical Analysis of Cognitive Radio TV Sets for Enhanced Spectrum Access*, Lincoln, Nebraska, Advisor: Mehmet Can Vuran

Study the business and technical feasibilities of dynamically sharing the television (TV) spectrum to secondary wireless networks based on cooperative TV sets. The outcomes include a quantitative analysis of the amount and characteristics of TV band spectrum holes in 274 U.S. cities to profile the technical feasibility and economic potential of dynamic sharing, a dynamic pricing scheme and a model of aggregate interference for the operators of secondary networks to serve wireless users and profit under the interruptions of TV viewers without interfering back.

2011-2013 *Remote Radio Head in 4th Generation LTE Base-station* (Ericsson), Chengdu, China

Conduct radio performance, environmental, and certification tests for the radio frontend of the 4th generation Long-Term Evolution (LTE) cellular base-station. Lead a team of 5 engineers in developing an in-house test automation software. Educate colleagues in the Integration and Verification Department in Python programming for radio frequency test automation.

2009-2011 *Digital Signal Processing Software in 4th Generation Cellular Base-station* (ArrayComm), Chengdu, China

Develop and optimize digital signal processing (DSP) software in WiMAX and LTE cellular base-stations. Implement the physical layer protocols, beamforming, MIMO, MU-MIMO, channel estimation, source & channel coding, and real-time operating system (RTOS) on flagship multi-core DSP processors.

2006-2009 *Channelized Software-Defined Radio Receiver*, Chengdu, China

Develop the intermediate frequency sub-system of a channelized multi-antenna software-defined radio receiver for electronic reconnaissance, including hardware

design and field-programmable gate array (FPGA) software. Design the FPGA sub-system comprises of high-speed filter-banks and data interfaces, and control unit.

RELEVANT SKILLS

Quantitative	Probability and stochastic processes, statistics, machine (deep) learning, optimization.
Programming	Python (Tensorflow, PyTorch), Matlab, R, SAS, C/C++, Javascript, Assembly, Verilog, SQL, Scripting languages in Excel, Linux, and OSX.
Computing	Familiar with Linux & OSX; experienced in programming on GPU, DSP, FPGA, SoC, and high-performance computing cluster (HPCC).
Languages	Native in Chinese; Proficient in English.
Others	Technical writing and presentation, software development process.

PUBLICATIONS

In Preparation

Zhongyuan Zhao, Ananthram Swami, and Santiago Segarra, "Distributed Link Sparsification for Scalable Scheduling using Graph Neural Networks," *IEEE Transactions on Wireless Communications,* manuscript in preparation.

Zhongyuan Zhao, Gunjan Verma, Ananthram Swami, and Santiago Segarra, "Distributed Routing in Dynamic Wireless Networks based on Packet Pheromone and Graph Neural Networks," *IEEE International Workshop on Computational Advances in Multi-Sensor Adaptive Processing (CAMSAP 2023),* manuscript in preparation.

Under Review

Zhongyuan Zhao, B. Radojicic, G. Verma, A. Swami, and S. Segarra, "Delay-aware Backpressure Routing using graph neural networks," *IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP),* 2023, submitted to.

Peer Reviewed Journal Articles

2022 **Zhongyuan Zhao,** Gunjan Verma, Chirag Rao, Ananthram Swami, and Santiago Segarra, "Link Scheduling using Graph Neural Networks," *IEEE Transactions on Wireless Communications,* accepted for publication. DOI: 10.1109/TWC.2022.3222781

2014 **Zhongyuan Zhao**, Mehmet C. Vuran, Demet Batur, Eylem Ekici, "Ratings for Spectrum: Impacts of TV Viewership on TV Whitespace," IEEE Global Communications Conference, pp.941-947, Austin, TX, December 8-12.

TEACHING EXPERIENCE

University of Nebraska-Lincoln, Graduate Teaching Assistant

Data Structure and Algorithms (fall 2017, spring 2019)

Multi-Agent System (fall 2017)

University of Electronic Science and Technology of China, Teaching Assistant

Electronic Design Training Program (fall 2005 - summer 2007, 2-year program)

PROFESSIONAL SERVICE

Conference Activities

Session Co-chair, Machine Learning for Communications, *IEEE International Conference on Acoustics, Speech, and Signal Processing (ICASSP),* Singapore, May 2022

Technical Program Committee Member*, IEEE Vehicular Technology Conference 2020-Fall*
